### WORK EXPERIENCE

#### Senior Java Developer / Engineer

Remote / International Projects  
June 2022 – Present

- Designed and implemented scalable microservices using Spring Boot and Java, supporting high-traffic production systems.
- Built secure RESTful APIs with Spring Security, JWT, and OAuth2.
- Optimized database interactions using JPA/Hibernate, improving performance by 40%+.
- Designed event-driven services using Kafka/RabbitMQ for asynchronous processing.
- Collaborated with DevOps teams to containerize applications using Docker and deploy via CI/CD pipelines.
- Led code reviews, enforced best practices, and mentored junior developers.
- Implemented centralized logging, monitoring, and exception handling strategies.
- Authored technical documentation and architectural decision records (ADRs).

#### Java Developer / Backend Engineer

Gilah Global Limited // Lagos, Nigeria  
May 2019 – Dec. 2022

- Developed enterprise backend systems using Spring MVC, Spring Boot, and Hibernate.
- Designed relational database schemas and wrote optimized SQL queries.
- Built batch processing and background job systems.
- Integrated third-party services and internal APIs.
- Troubleshooted production issues and implemented long-term, scalable fixes.
- Worked closely with frontend, QA, and product teams to deliver end-to-end solutions.

### EDUCATION

#### Lagos State University

Bachelor of Engineering (B.Eng.) Electronic and Computer Engineering

### ACHIEVEMENTS

- Delivered high-availability Java systems with minimal downtime.
- Reduced API response times by 30–50% through performance tuning.
- Led successful migration from monolithic systems to microservices architecture.
- Supported distributed teams and enterprise-level deployments.

### SUMMARY / OBJECTIVE

Senior Java Developer / Engineer with 7+ years of professional experience designing, building, and maintaining high-performance, secure, and scalable backend systems. Strong expertise in Java (8–21), Spring Boot, microservices architecture, REST APIs, and cloud-native applications. Proven track record of delivering production-ready systems, leading technical decisions, and collaborating effectively with cross-functional and remote teams.

### SKILLS

#### Programming

- Java (8, 11, 17, 21), OOP, Functional Programming

#### Frameworks

- Spring Boot, Spring MVC, Spring Security, Spring Data JPA

#### APIs

- RESTful APIs, OpenAPI (Swagger), JSON, OAuth2, JWT

#### Databases

- PostgreSQL, MySQL, MongoDB, Redis, Oracle

#### Architecture

- Microservices, Event-Driven Architecture, Clean Architecture

#### Cloud & DevOps

- AWS, Docker, Kubernetes (working knowledge), CI/CD

#### Testing

- JUnit 5, Mockito, Integration & Contract Testing

#### Messaging & Streaming

- Kafka, RabbitMQ

#### Version Control

- Git (GitHub, GitLab, Bitbucket)

#### Build Tool

- Maven, Gradle

#### Methodologies

- Agile / Scrum, Domain-Driven Design (DDD)
